

**Turf. Reimagined.**

# Installation Guide

**Prep the ground**

**Make the  
surface level**

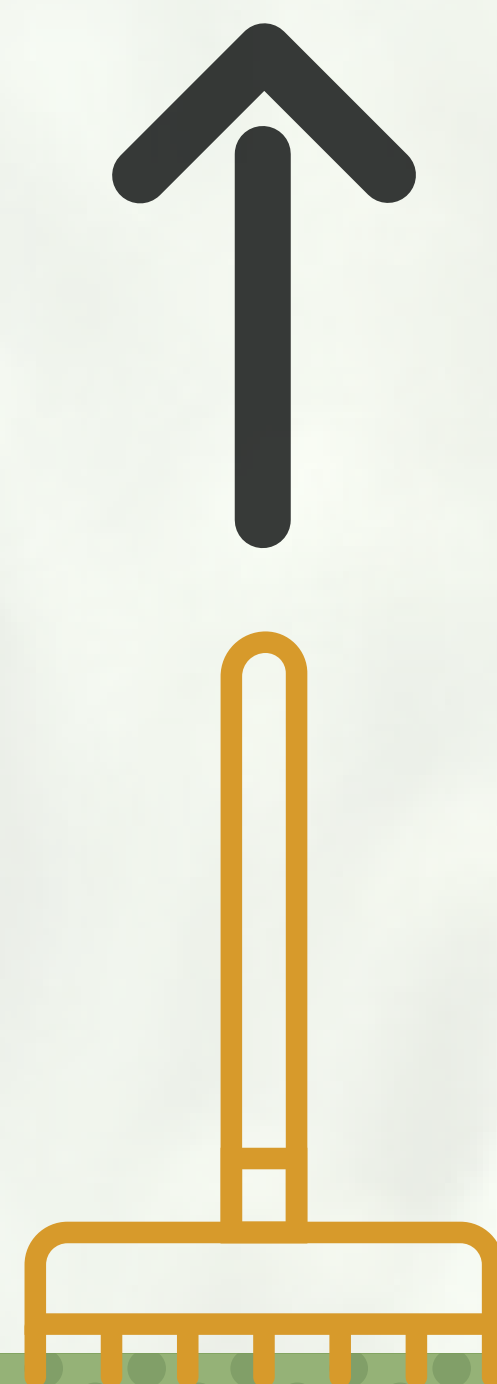

**Unroll 1 roll**

**Lay the roll up against  
your perimeter**

**Anchor starting end**

**Ensure the StaySeam  
edges are facing toward  
the direction of your  
next roll.**

**Stretch with rake**

**Anchor opposite end**

**B**

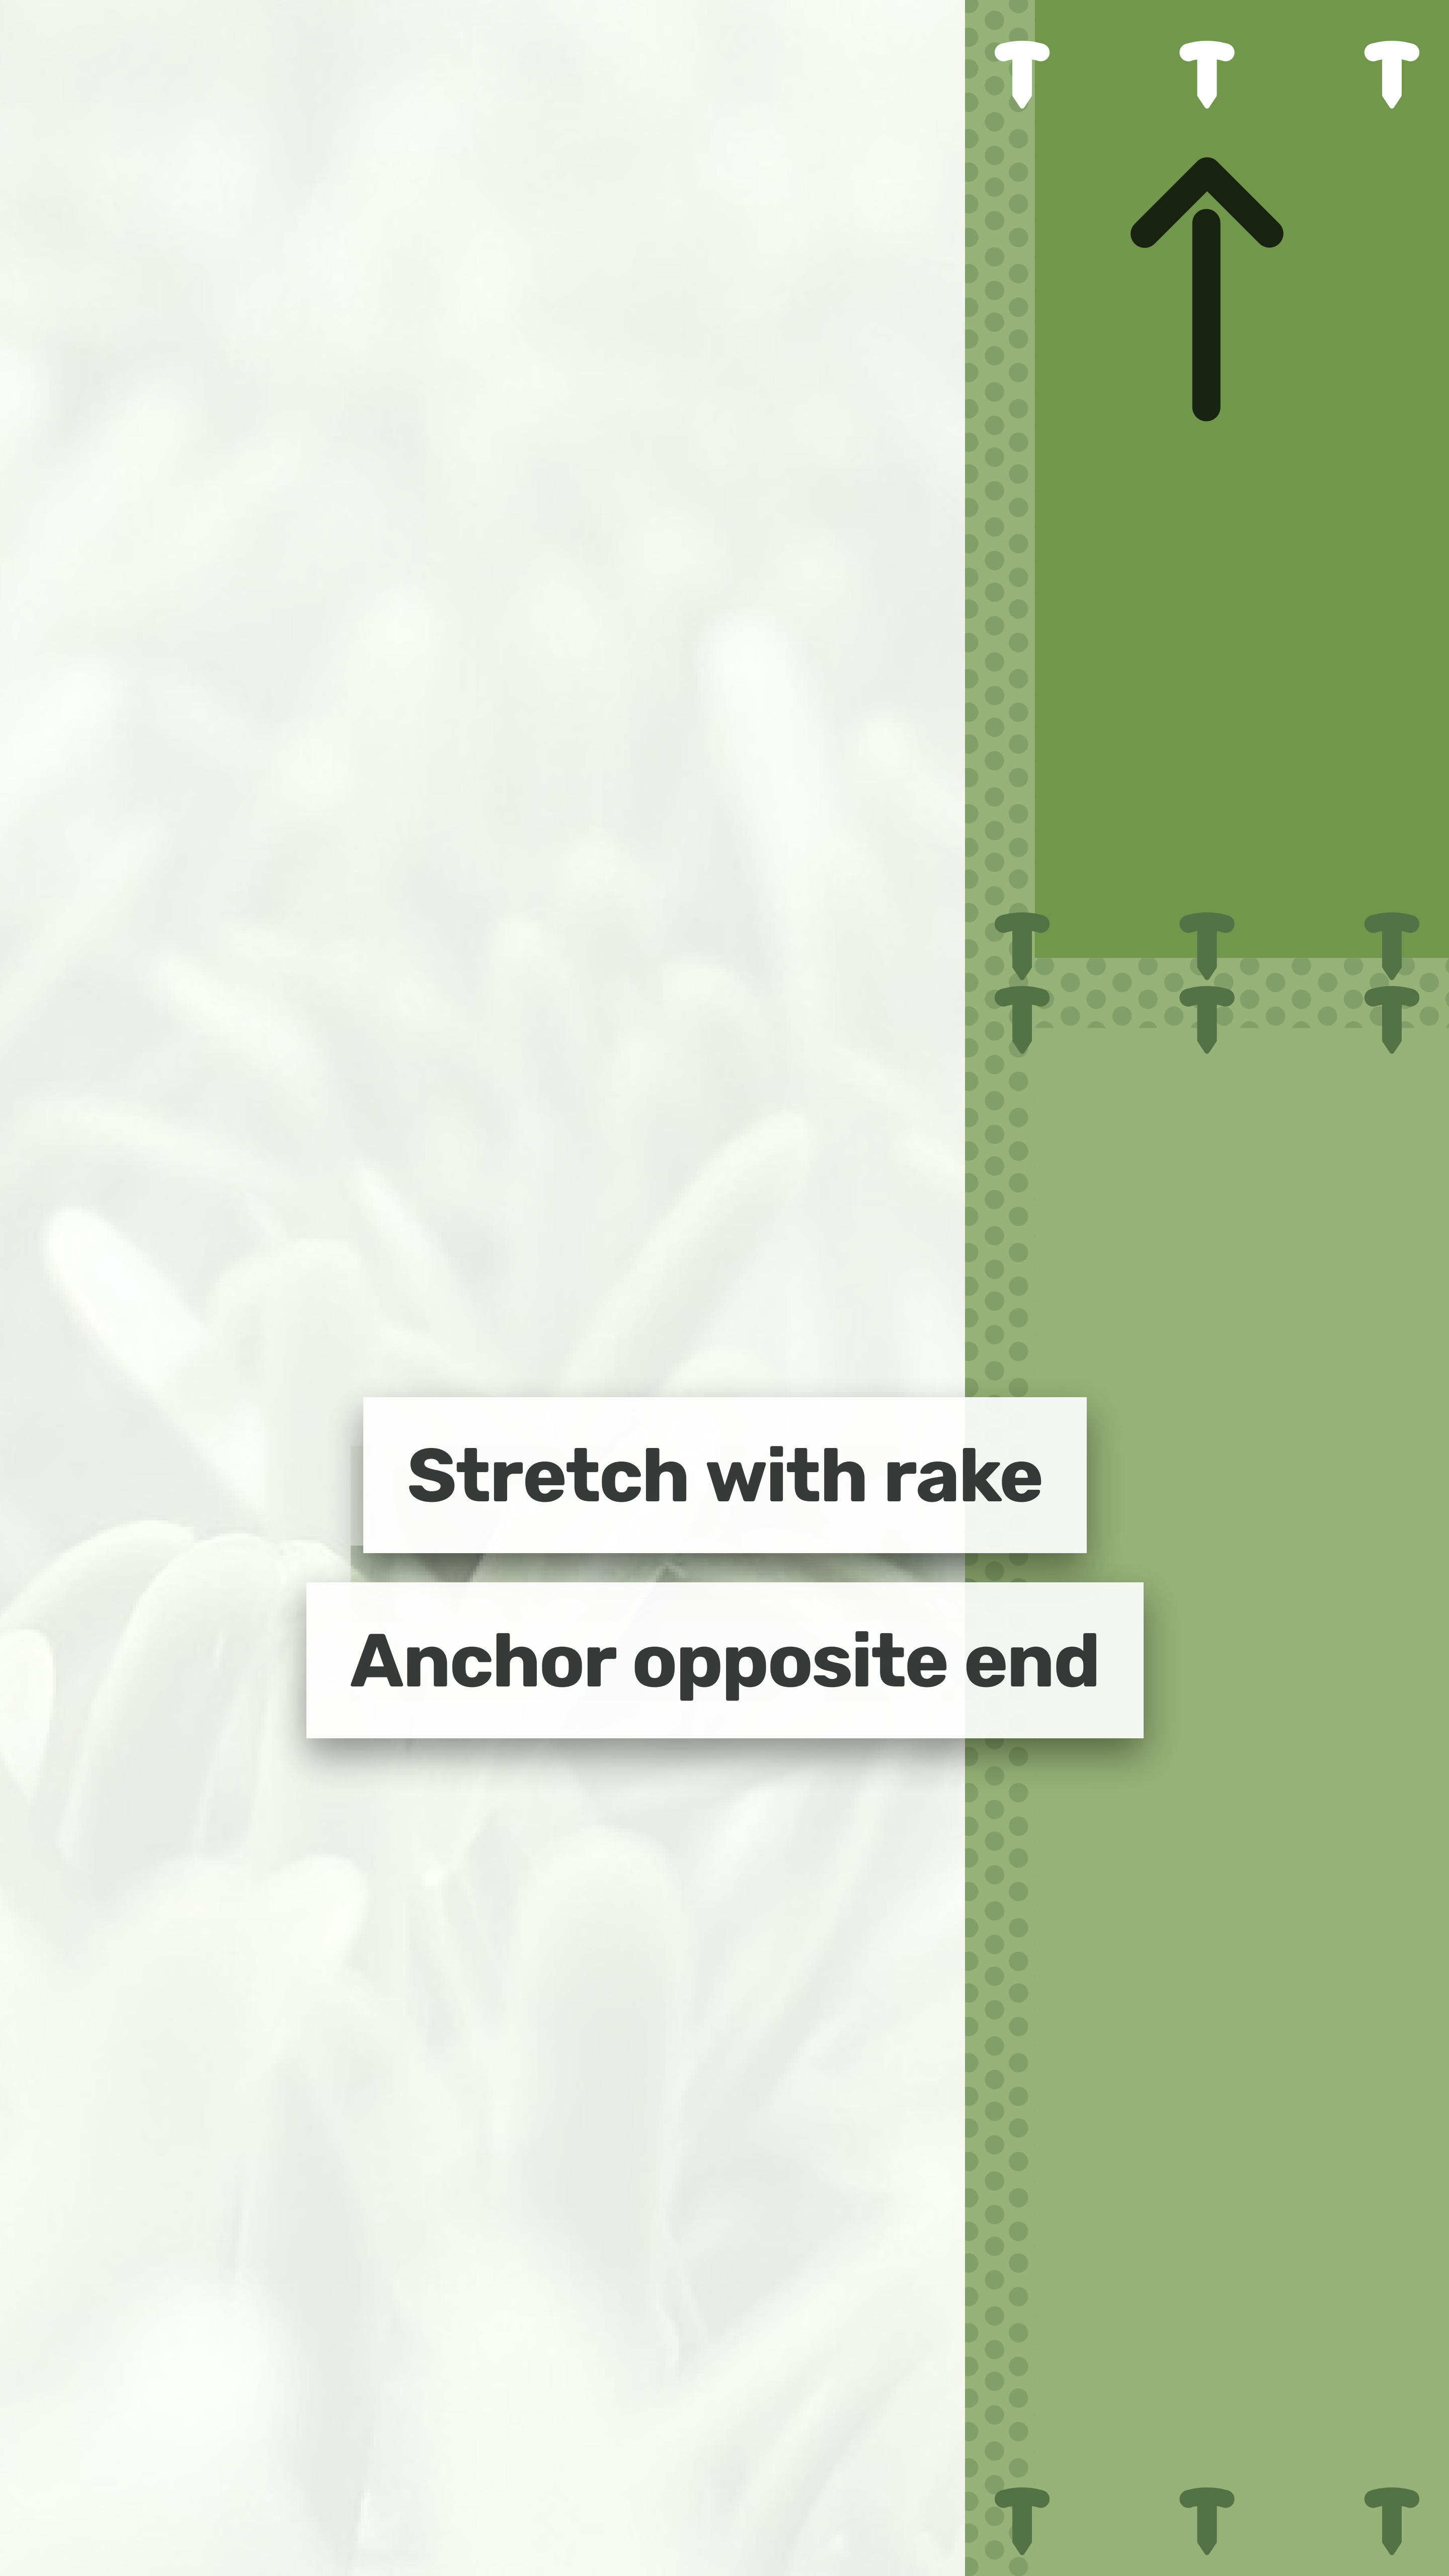

**A**

**Start a new roll at  
end of previous roll**

**Position anchors  
to penetrate Roll A  
and Roll B, overtop  
the StaySeam**

**Cut with scissors  
or shears to fit**

**Stretch with rake**

**Anchor opposite end**

**Take remainder  
of cut roll and start  
another strip**

**Layer the next strip (C)  
on top of the StaySeam  
of the existing strip (A)**

**Anchor the starting  
end, ensuring to  
penetrate both strips  
along the StaySeam**

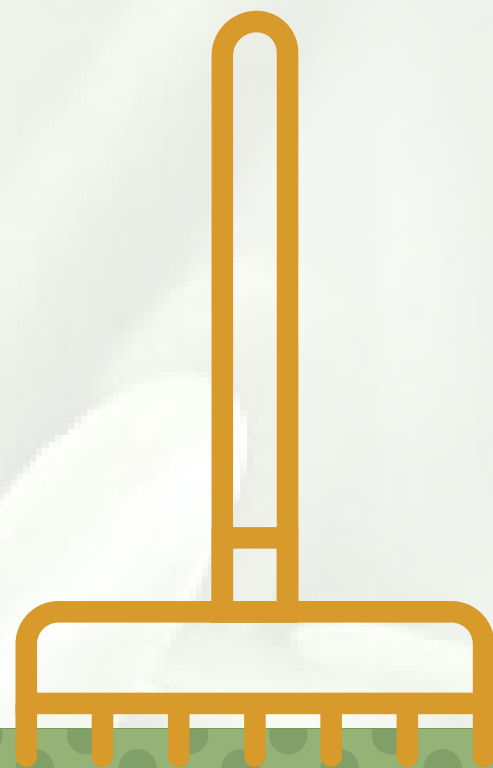

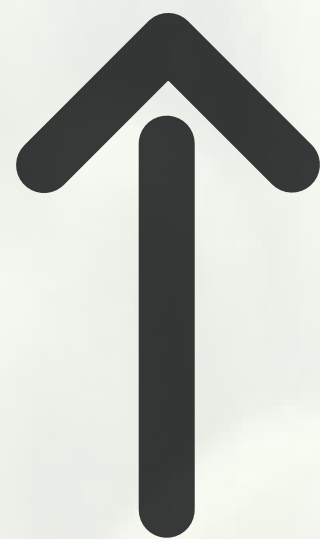

**C**

**A**

**Stretch with rake**

**Anchor opposite end**

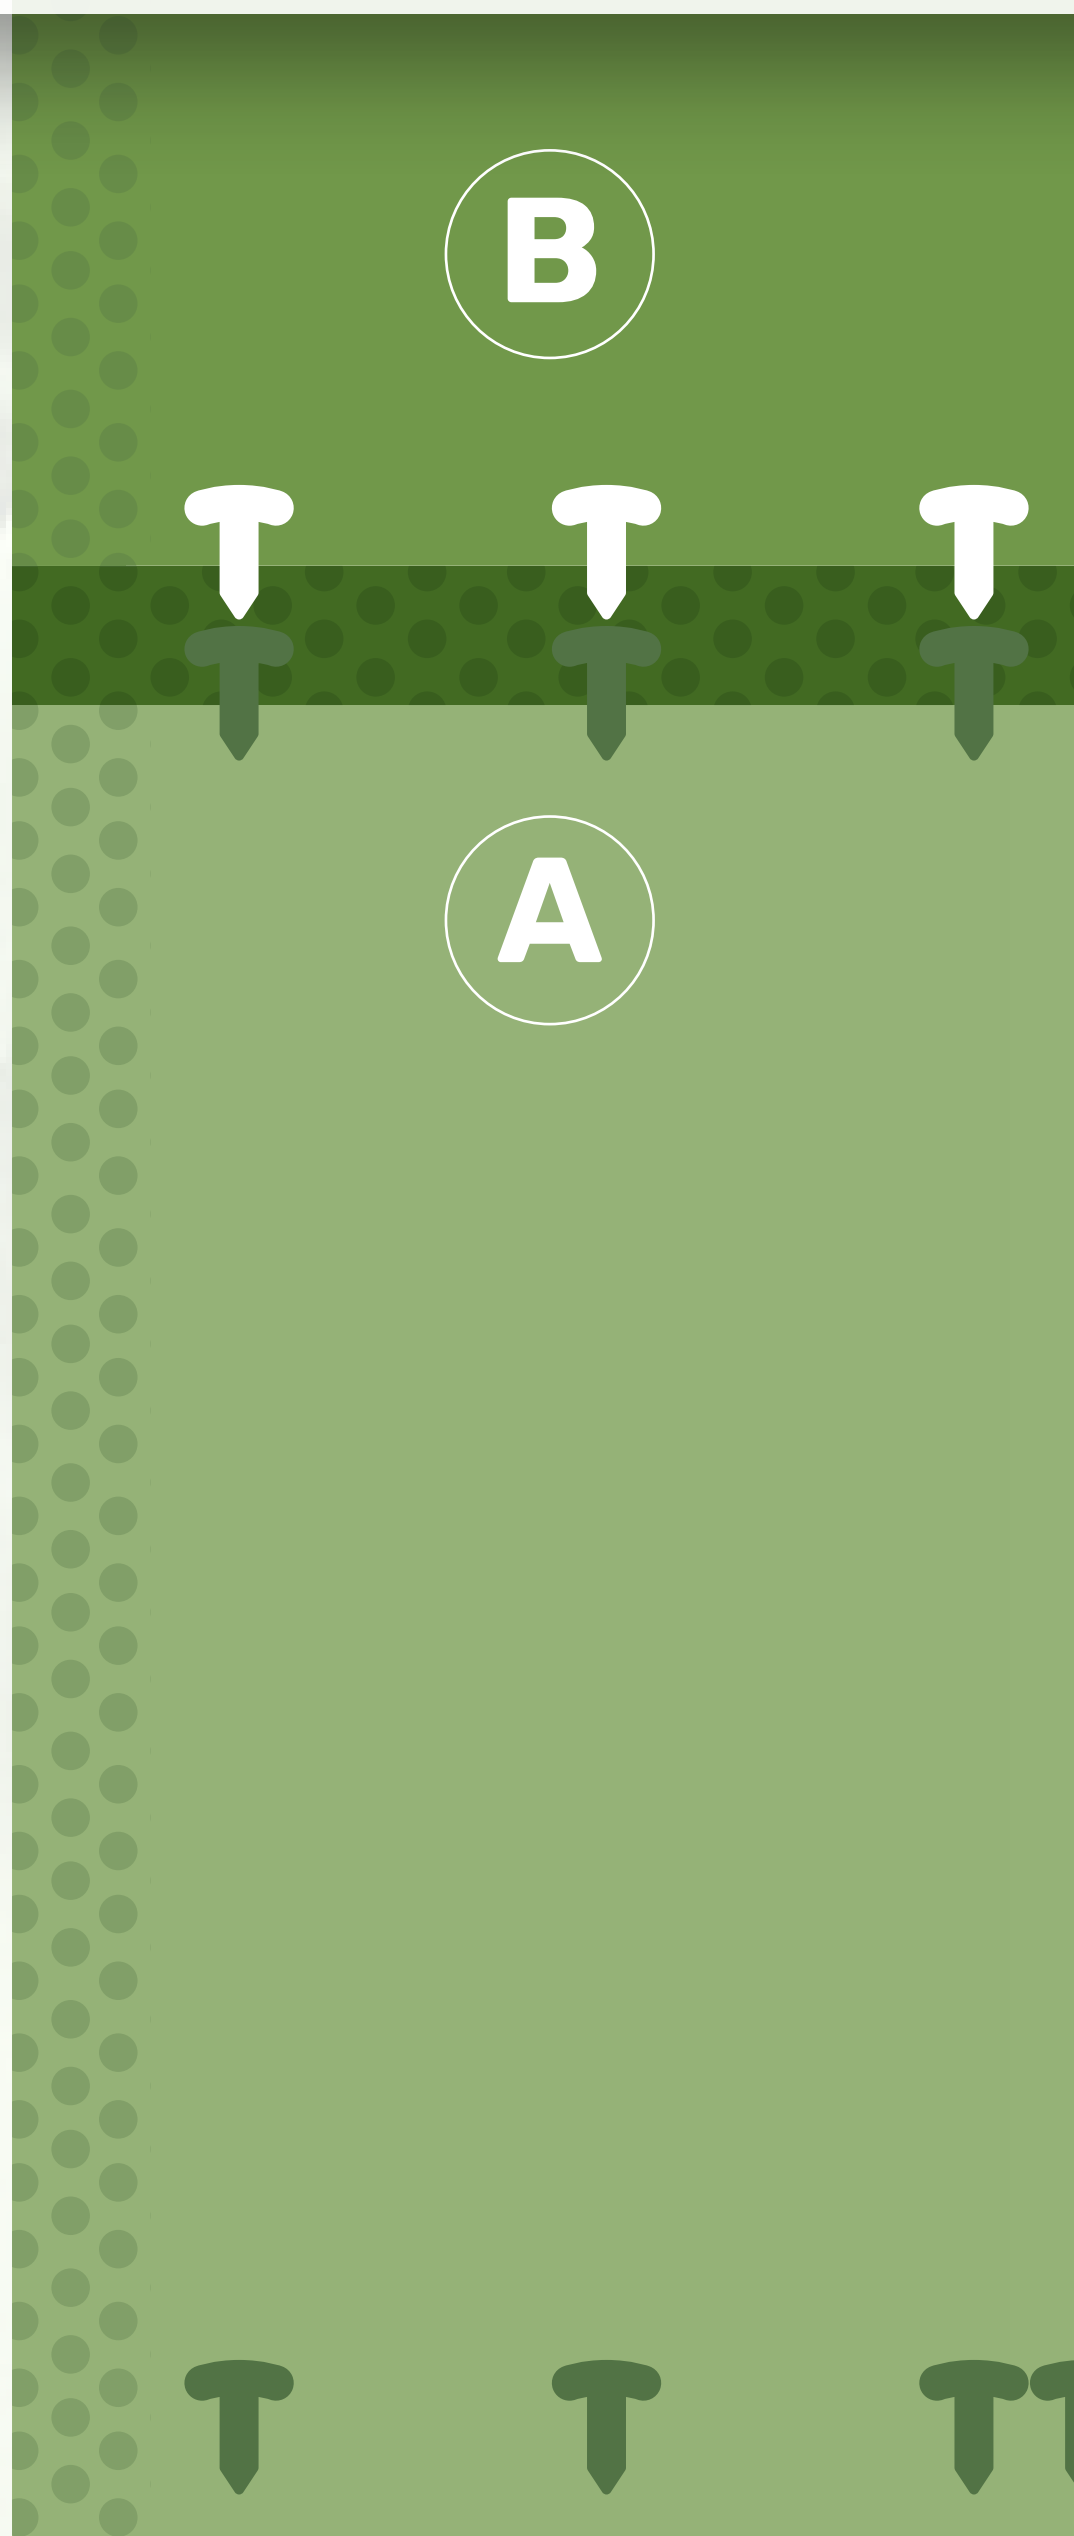

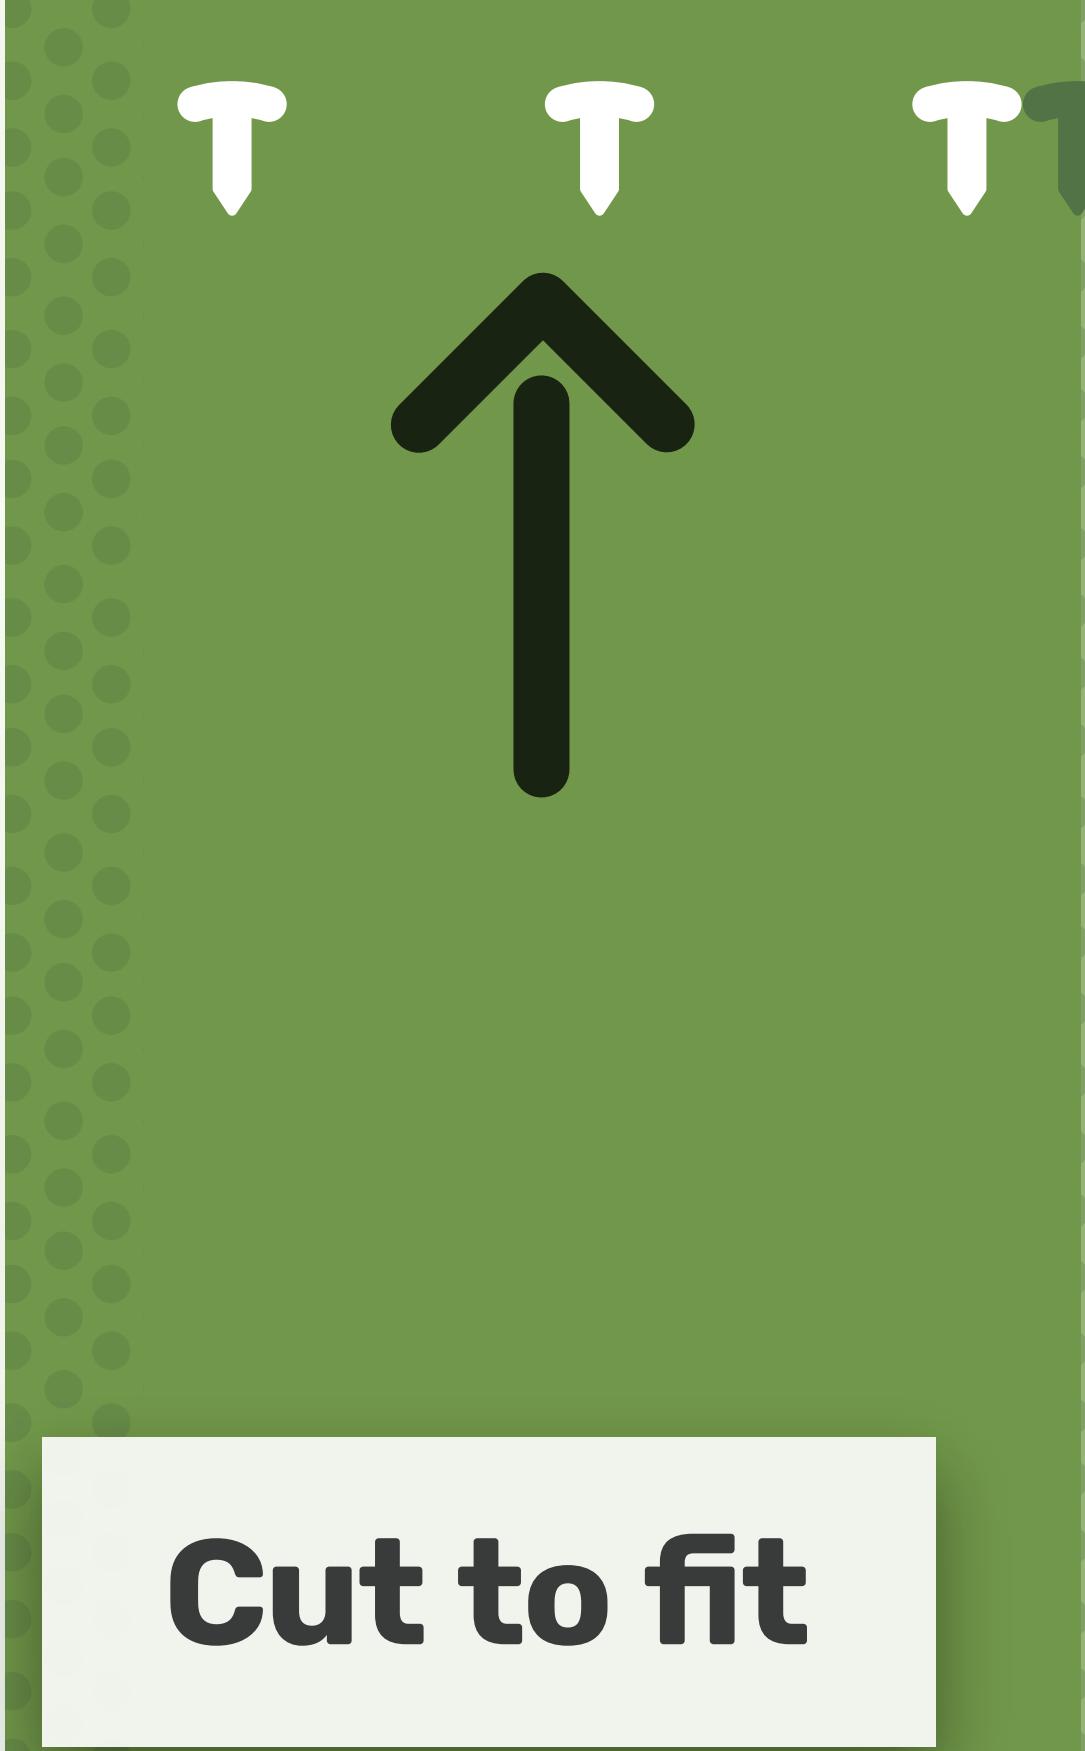

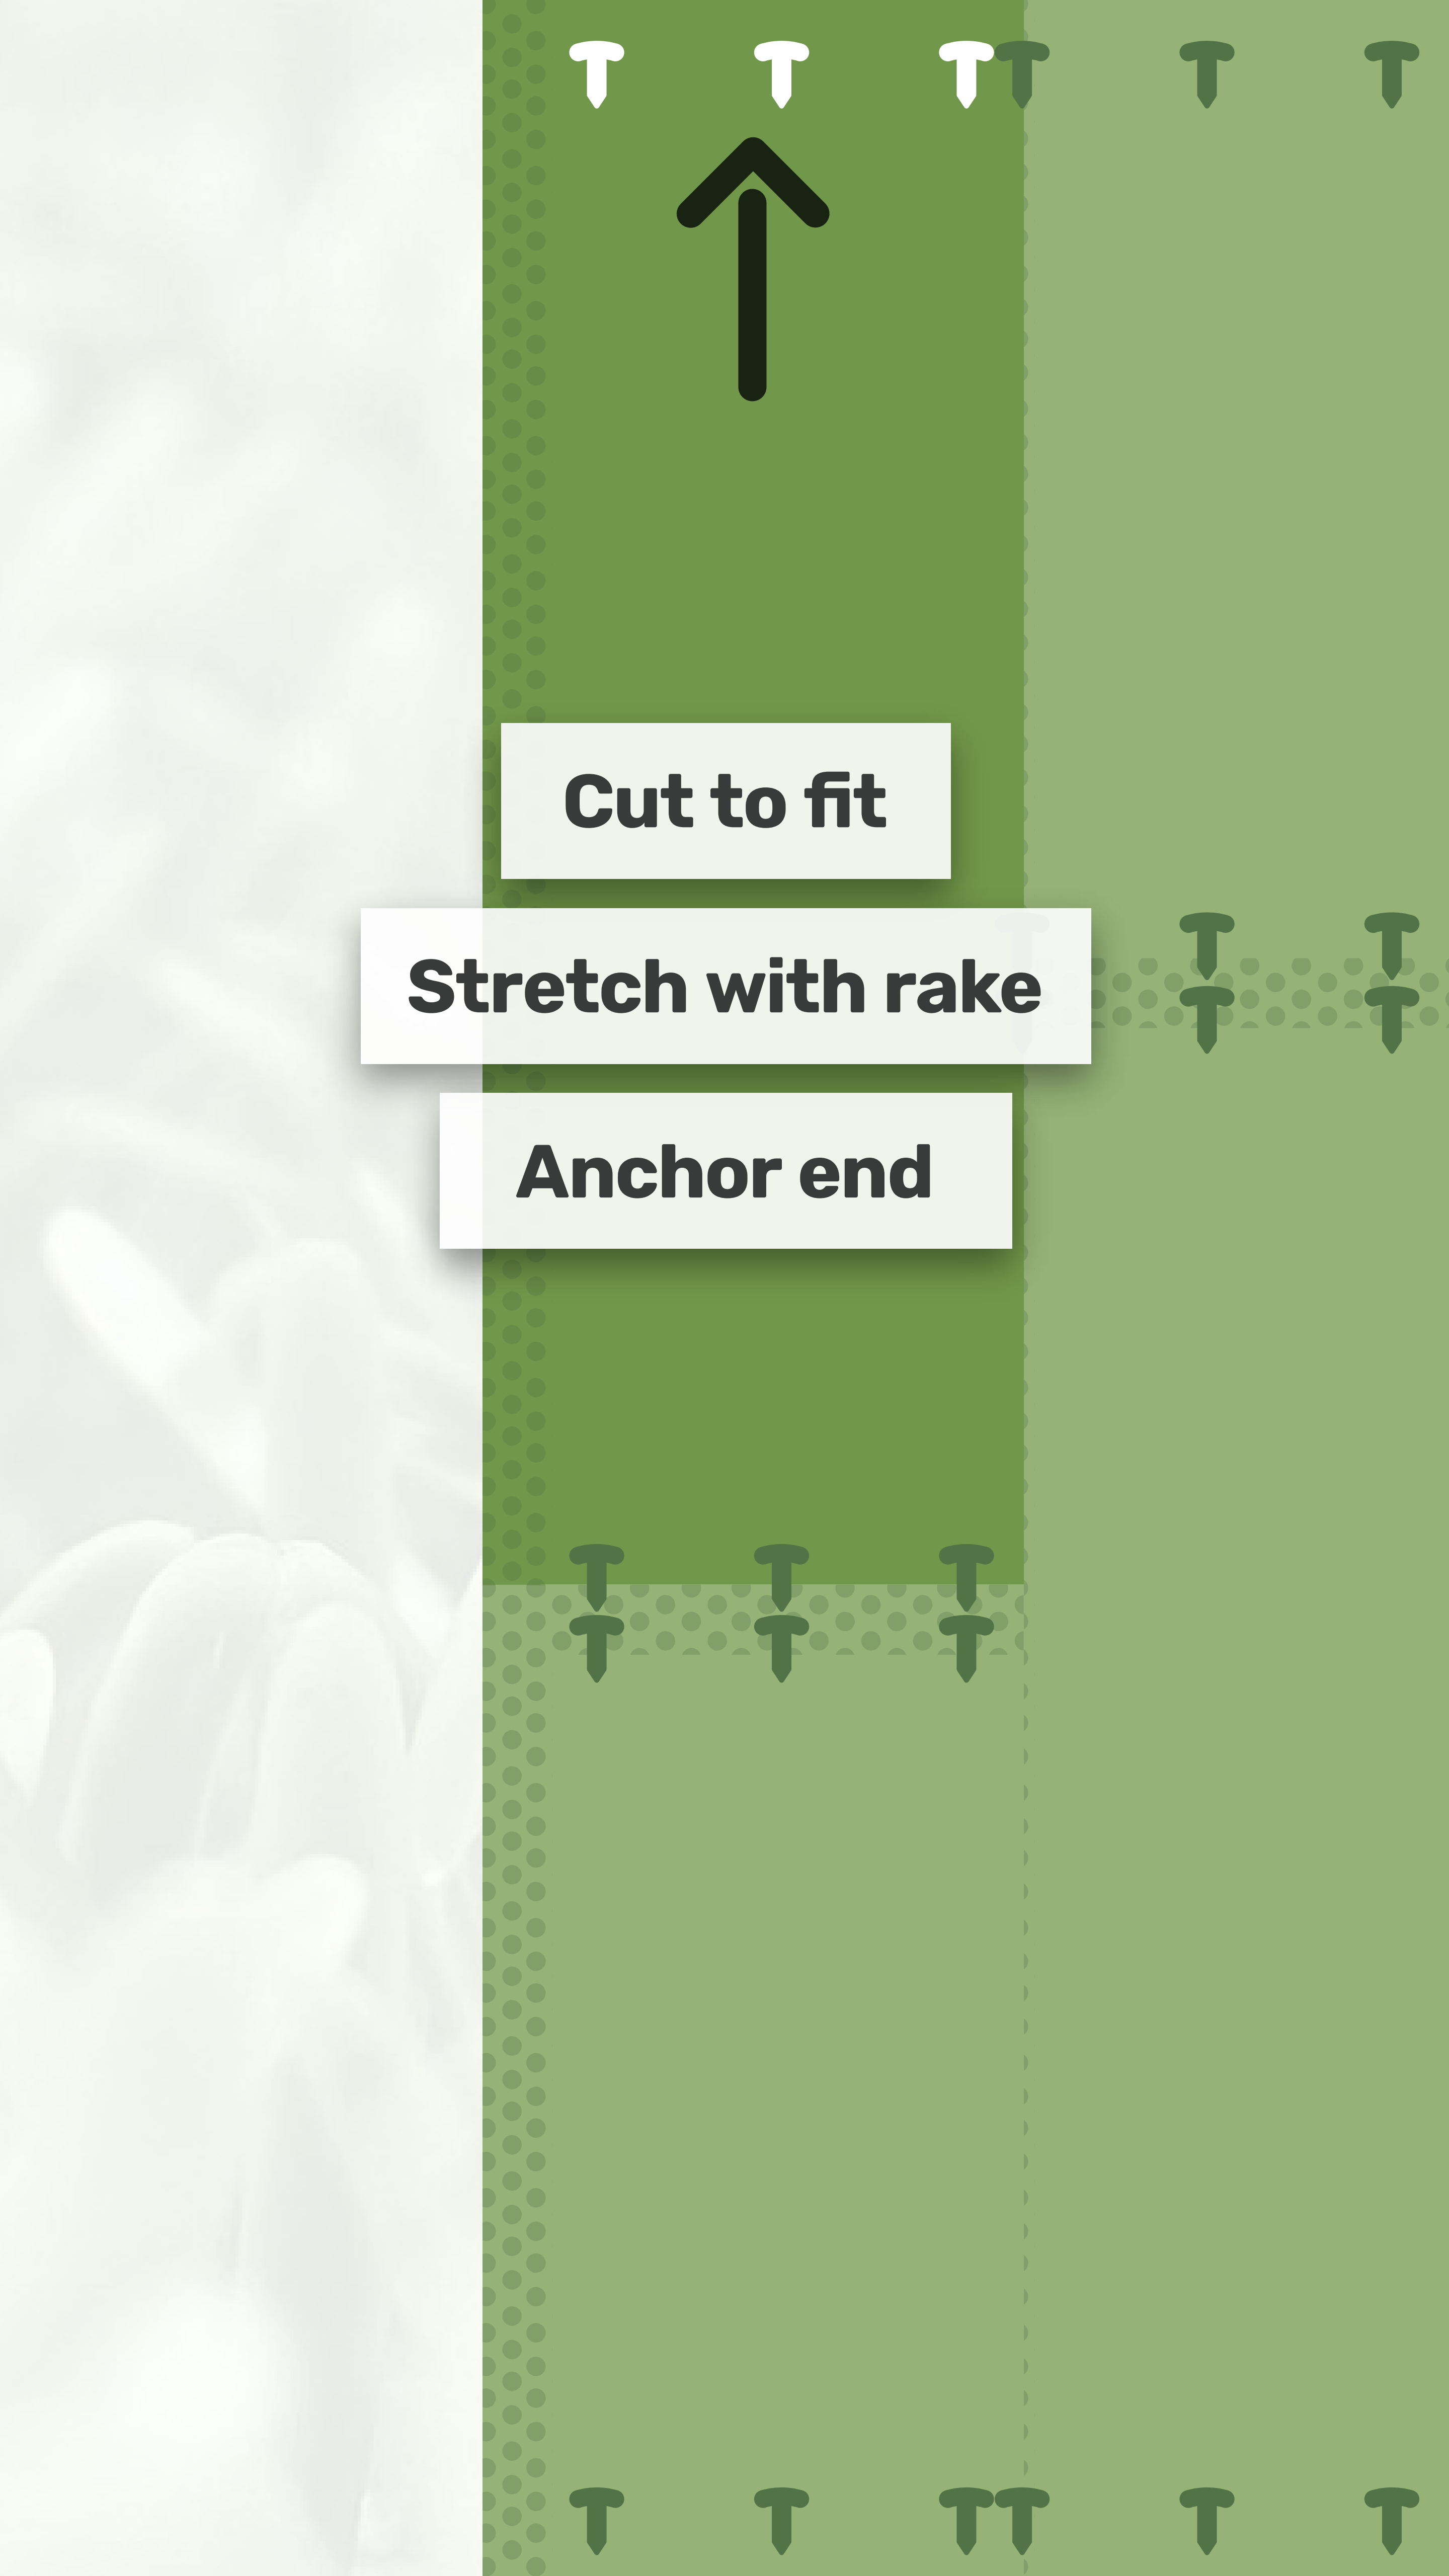

**Unroll next roll  
at end of last roll**

**Align so the edge of the  
new strip overlaps the  
StaySeam of the  
existing strip**

**Position anchors  
to penetrate Roll A  
and Roll B, overtop  
the StaySeam**

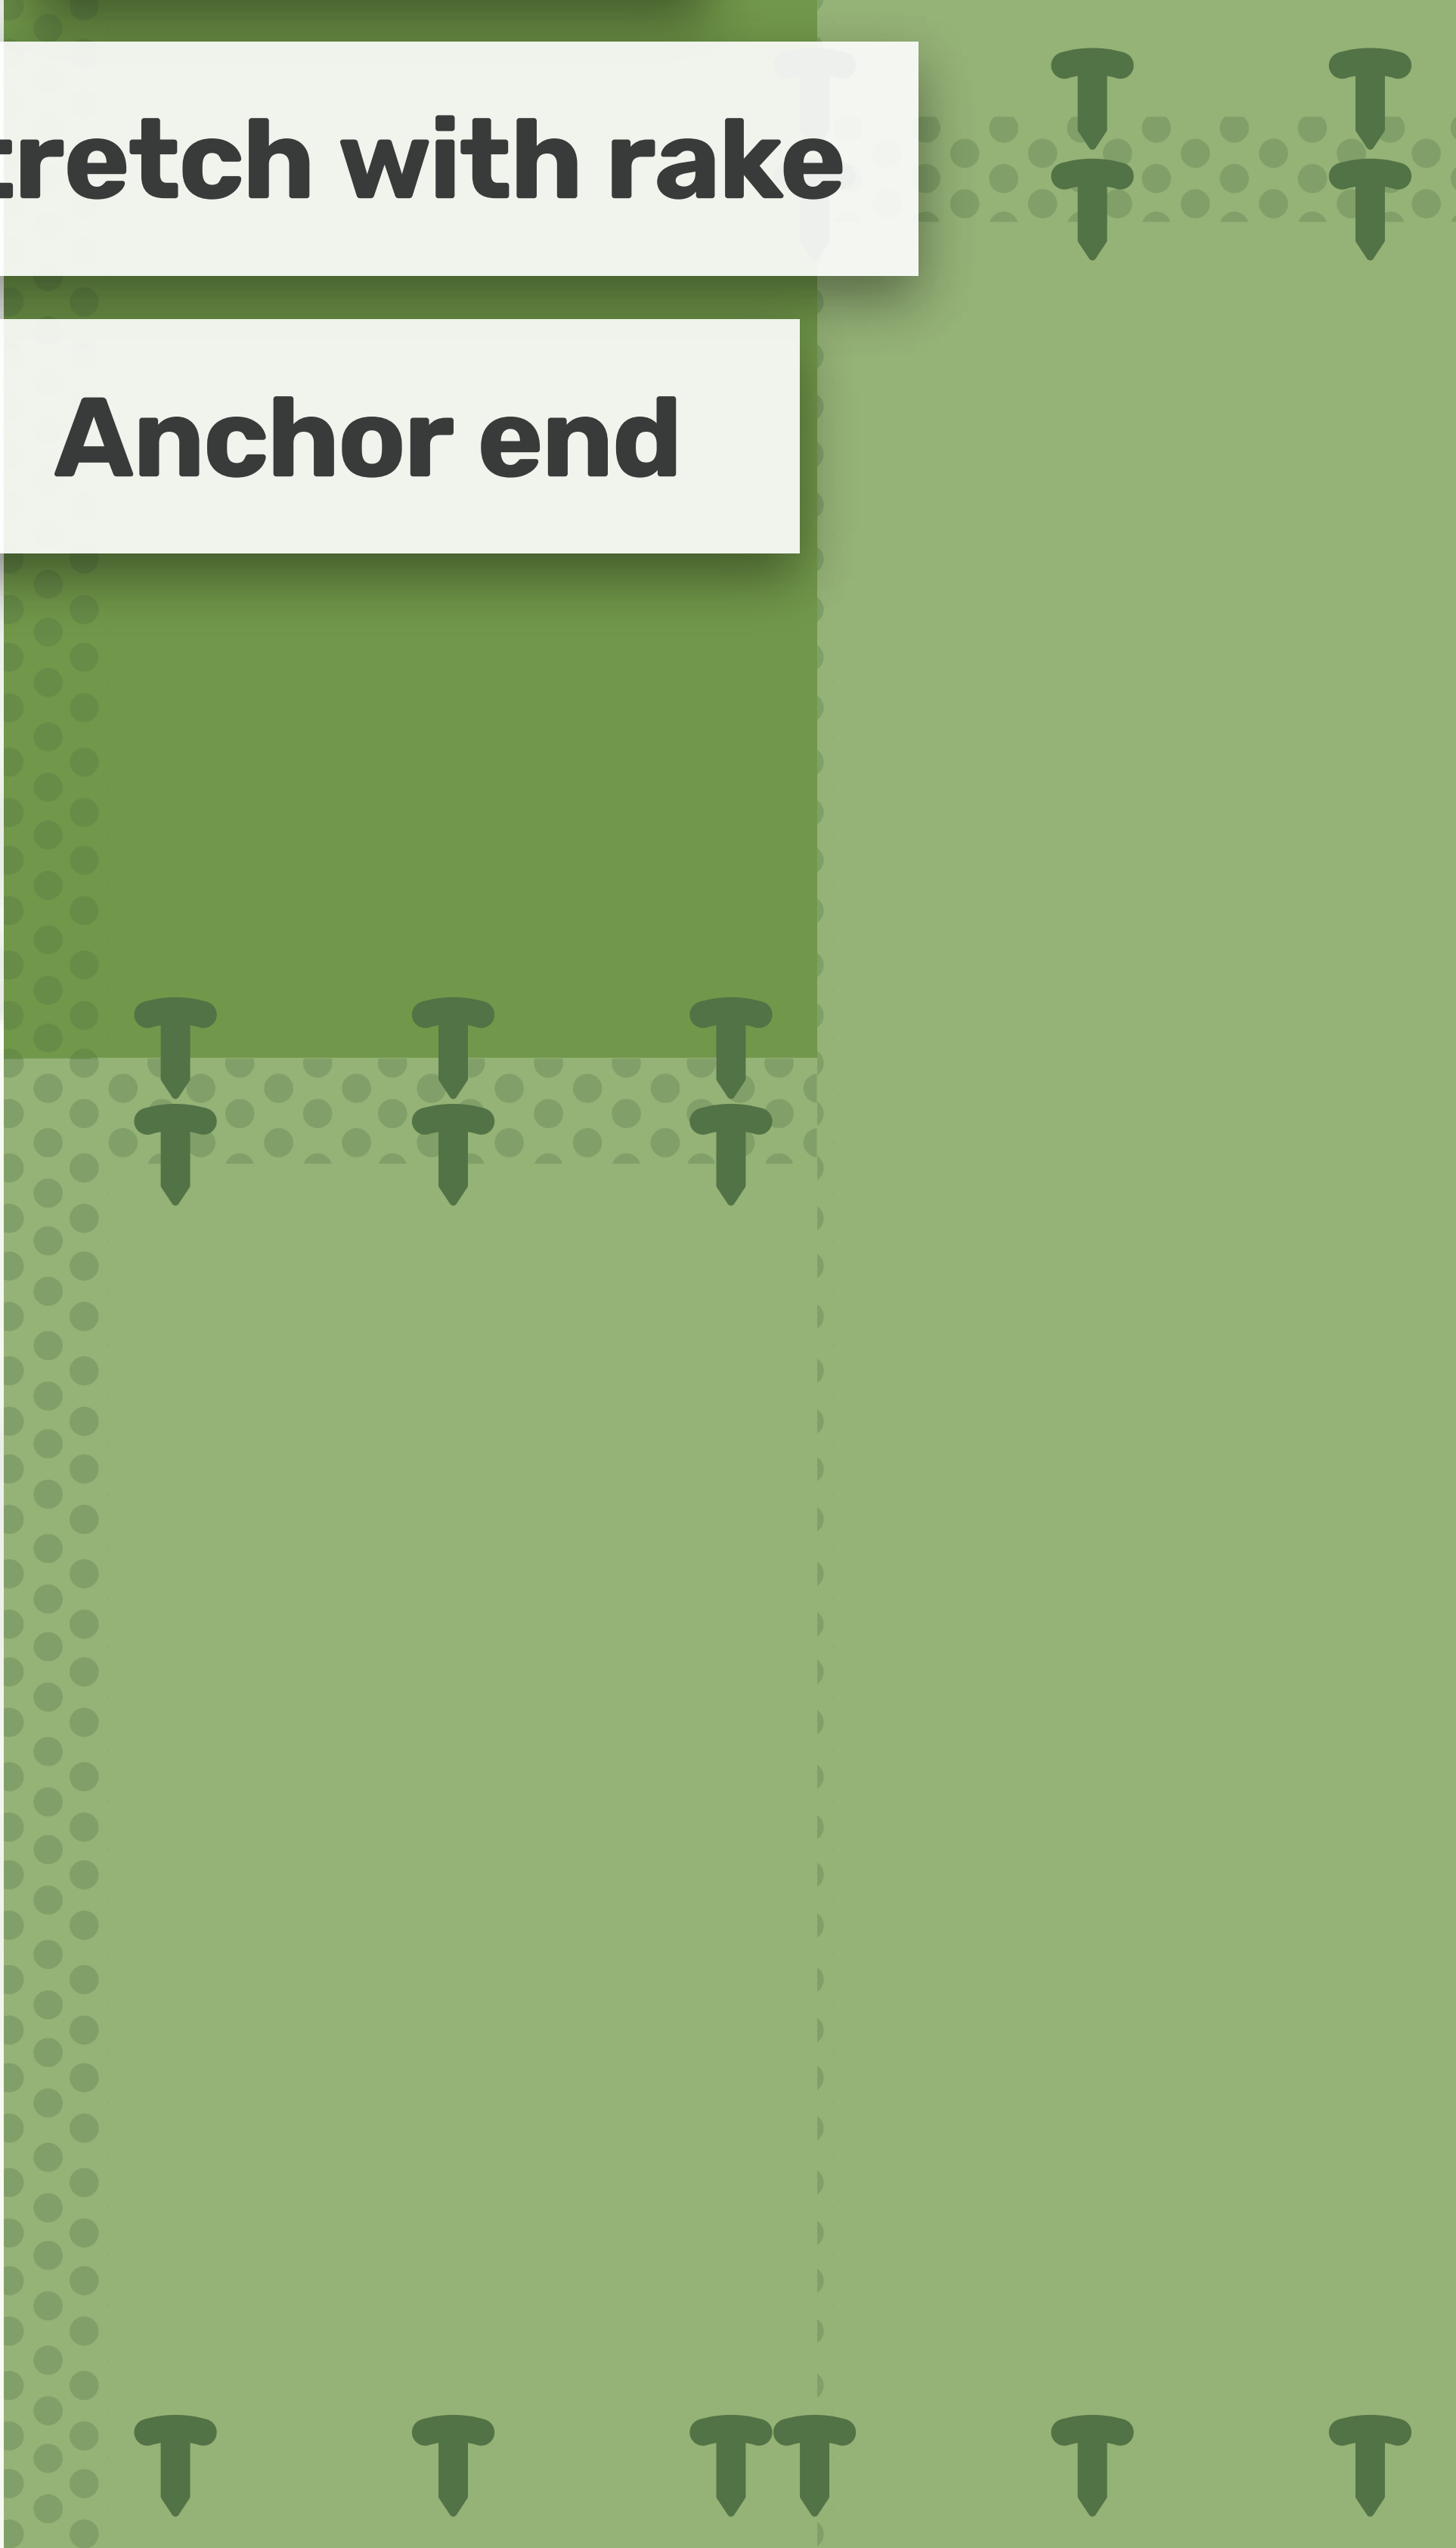

**Cut to fit**

**Stretch with rake**

**Anchor end**

**Anchor along seams before  
placing next strip**

**Anchor about every 18"**

**Use "T" shape of anchors  
to penetrate through both  
layers of the StaySeam and  
lock in 2 strips at once**

**Continue across yard**

**Anchoring as you overlap seams**

**Use additional  
anchors in center of  
strips where you see  
low areas**

**Use additional  
anchors near entry  
points to firmly  
secure to ground**

**Sprinkle sand or fill dirt along any seams that are not laying flat**

**Put additional dirt over exposed seams at entry points to keep strips from rolling up**
